

Recommissioning for Existing Buildings

20 November

Best Western Ottawa Centre—1274 Carling Avenue

Recommissioning (RCx) improves buildings to save energy and make buildings more comfortable for their occupants

Increasing occupant comfort and satisfaction while reducing energy operating costs is a powerful way to unlock value in your building assets. It has been well documented that the practice of Existing Building Commissioning (EBCx) will reduce operating costs while improving the quality of the indoor environment.

BOMA, in partnership with CIET, will host this one-day workshop that will provide participants with a practical approach to EBCx, with a specific focus on the elements of a robust investigation. **Space is limited, so register early.**

The workshop leader is a seasoned EBCx professional and will provide examples, case studies from a variety of commercial and institutional building types. A strong focus will be placed upon the operational efficiency of HVAC systems.

Who should Attend?

This workshop is beneficial for Building owners, managers and technical supervisors

Registration:

\$375 plus \$48.75HST total of **\$423.75** (deadline to register November 15th)

Register on line with [Event Brite](#) (extra charges apply) or save over \$25 by e-mailing this completed form to administration@bomaottawa.org

Name: _____

Payment Options:

Cheque payable to BOMA Ottawa **OR**

Visa MasterCard Sorry no Amex

Card Number: _____ Expires: _____

Cardholder Name: _____

Objectives

- To describe the benefits of RCx/ENCs
- To describe the process employed in RCx/EBCx
- To identify the indicators of the need for RCx/EBCx
- To assess the savings potential for a particular building
- To be able to create a plan for applying RCx/EBCx
- To be able to support the investigation
- To determine who will be involved
- To identify critical elements to ensuring persistence of results

Agenda

The workshop begins at 8:30 and ends at 4:30, with a one hour lunch break.

- Introduction
- Energy Efficiency Concepts
- Overview of RCx/EBCx
- The Planning Phase
- How to select/identify the right building for RCx
- Investigation
- Investigating our buildings -tools and opportunities
- HVAC Systems
- Building Automation Systems
- Fault detection and diagnostics
- Implementation
- Transfer and Persistence
